To Whom It May Concern:

As the project manager for a master planned community, I have engaged Lippke Cartwright & Roberts (LCR) as the lead engineer on the project. Their performance has been nothing less than outstanding. At Caldwell Companies we try to inspire community within our developments and as such "ownership" of a project is an important ingredient for each consultant to contribute. LCR goes above and beyond when it comes to client satisfaction. Their meticulous attention to detail and supervision of construction has saved me time and money time and time again. I trust LCR with all engineering decisions on the project and they keep me well informed and updated on all aspects of the project. I would recommend Lippke Cartwright & Roberts to any party in need of professional engineering services.

Respectfully,

Todd Johnson Project Manager
Caldwell Companies Residential Development
